

Multi Award Winning Builder of Distinction

Metod Mohar is a winner of several recent HIA awards where the best builders in Victoria enter homes in various categories. His most recent house at Sanctuary Lakes, which sold for a record price in the area, won first prize for the bathroom. The criteria for the award were design aesthetics and functionality. Metod personally designed the fittings and had them fabricated. The kitchen of this home was runner up against some of the biggest kitchen manufacturers and overall the house won first prize in its category. Metod will be entering again this year and I expect he will win again.

Working Outside The Square

As a builder of distinction, Metod places emphasis on one to one communication with his clients. As he says, he likes to work outside the square. He comes up with a design idea and

then works out how to do it with his loyal team of sub-contractors. The design concept must be aesthetically pleasing, functional to live in, and of good quality craftsmanship. He knows people prefer personalized service and his one on one approach makes this possible.

The Complete Builder

Metod is the designer, estimator, the supervisor, the builder and does his own carpentry on site so

you deal directly with the boss. Metod uses top quality trades people and top quality materials. He only builds a few homes a year so he can give his clients personal service and expert advice based on his 26 years experience in the industry. The finished product speaks for itself. Metod can also do extensions and renovations and even designs his own furniture. He is truly the complete builder, which the discerning client will appreciate.
